

A cost-effective PDF tool built for engineering drawings

Simple, effective mark-up for P&IDs, ISOs, GAs and site plans — without Bluebeam or Adobe prices. Ready-made trade symbols. Support included. £125.00 per year.

The everyday problem

Most commercial PDF editors are expensive and complicated. Teams pay for features they never use, yet still lack the symbols they need for P&IDs and site drawings.

A practical alternative

V.O.S. PDF Editor is built for construction and commissioning. Mark up vendor drawings or start a blank A4–A1 sheet. Trial on request. Updates while the licence is active.

Why teams choose it

Ready-made symbols

P&ID valves and instruments, civil / site marks, electrical and instrumentation balloons. Save your own hook-ups as My symbols and stamp them again.

Built for drawings

White-out vendor notes. Copy a section of the original sheet, paste it, resize and rotate. Revision clouds with a sized scalloped edge.

Measure the sheet

Calibrated length on the line, area, count, angle and radius. Grid, snap and ortho keep new linework square. Compare two revisions in red.

£125.00 per year

One seat, one year. A start and end date you can see — not an open-ended subscription. Support and updates included. No hidden fees.

In the box

Mark-up the drawing

Pen, line, arrow, box, oval, triangle, polyline, highlight, text, callout and numbered tags. Click-dot revision cloud with a sized scalloped edge. Hatch fills. Insert a photo.

Work the original sheet

White-out to cover vendor linework. Copy an area of the original PDF, paste it where you click, then resize from a corner or rotate from the centre handle. Group items so they move together.

Build and reuse

Start a blank A4, A3, A2 or A1 page. Grid, snap and ortho. Save a selection as My symbol. Built-in P&ID, civil, electrical and instrumentation packs, plus test-pack legends.

Measure and check

Dimension with length on the line. Area, count, angle and radius. Search words on the sheet. Compare two revisions — the second drawing overlays in red.

Run the job

Open / Done status on each mark-up. Export the list as CSV. Rotate, extract or insert pages. Combine PDFs. Save editable (PDF + sidecar) or flatten for issue.

Licence & support

£125.00 per year per seat. Trial on request. Free updates during the active licence. Assistance, maintenance and reasonable development covered. No hidden fees.
